Nuinsco Announces Appointment of John Pollesel as Strategic Advisor

Toronto, November 19, 2026 – Nuinsco Resources Limited ("**Nuinsco**" or the "**Company**") (CSE: NWI, FRA: NJX) today announced the appointment of John Pollesel as Strategic Advisor to the Company's Board of Directors, effective immediately. The appointment comes as Nuinsco continues to develop its Prairie Lake Critical Minerals Project in northwestern Ontario.

"John Pollesel brings a rare combination of senior mining, financial and corporate leadership experience to Nuinsco," said Paul Jones, Chief Executive Officer. "His perspective will be particularly valuable as we set priorities and make key decisions on the path forward for Prairie Lake."

Mr. Pollesel's background in large-scale mining operations, capital project execution, corporate finance and public-company governance is expected to provide important insight as the Company moves Prairie Lake forward and assesses future development opportunities.

"Successful project development requires more than a compelling mineral asset. It also requires sound technical work, disciplined capital allocation and a clear path forward," said Mr. Pollesel. "Prairie Lake has the potential to become an important critical minerals project, and I welcome the opportunity to help Nuinsco evaluate that potential and determine how best to advance it."

Mr. Pollesel has more than 35 years of executive leadership experience in the global resource, mining and industrial products sectors. Most recently, he served as Senior Vice President, Mining at Finning (Canada), where he was responsible for the commercial, operational and technical leadership of the company's mining business across Western Canada. His earlier roles include Vice President and Chief Operating Officer, Base Metals Operations, North Atlantic, at Vale, and Vice President and Chief Financial Officer of Compañía Minera Antamina in Peru, one of the world's largest copper and zinc mining operations.

Mr. Pollesel is currently Lead Director of Electra Battery Materials Corporation and a director of North American Construction Group Ltd. He previously served on the board of Noront Resources Ltd. He holds an Honours Bachelor of Arts in Accounting from the University of Waterloo and an MBA from Laurentian University, and is a Fellow of CPA Ontario.

About Nuinsco Resources Limited

Nuinsco Resources is a growth-oriented, multi-commodity mineral exploration and development company focused on prospective opportunities in Canada and internationally, with more than 50 years of exploration success. In Newfoundland, the Company operates the Paradise Lake Gold Project in the central part of the province. In Ontario, it operates the large Prairie Lake critical minerals project (phosphate, rare earth elements, niobium, tantalum) near Marathon–Terrace Bay. The Company also holds an interest in the Zig Zag Lake Property (lithium, tantalum) near Armstrong, which is operated by First Class Metals PLC, and a net smelter return (NSR) royalty on the Sunbeam Gold Property near Atikokan. Internationally, Nuinsco holds the El Sid Gold Project in the Eastern Desert of Egypt. Please visit our website at www.nuinsco.ca.

Forward-Looking Statements

The information in this news release may contain forward-looking statements or information (collectively, "FLI") within the meaning of applicable Canadian securities legislation. FLI is based on expectations, estimates, projections, and interpretations as at the date of this document.

All statements, other than statements of historical fact, included herein are FLI that involve various risks, assumptions, estimates and uncertainties. Generally, FLI can be identified by the use of statements that include, but are not limited to, words such as "seeks", "believes", "anticipates", "plans", "continues", "budget", "scheduled", "estimates", "expects", "forecasts", "intends", "projects", "predicts", "proposes", "potential", "targets" and variations of such words and phrases, or by statements that certain actions, events or results "may", "will", "could", "would", "should" or "might", "be taken", "occur" or "be achieved."

FLI in this document may include but is not limited to: statements regarding the expected role and objectives of the creation of a Strategic Advisor position and the potential for further project development.

FLI is designed to help you understand management's current views of its near- and longer-term prospects, and it may not be appropriate for other purposes. FLIs, by their nature, are based on assumptions and involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance, or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by such FLIs. Although the FLI contained in this document is based upon what management believes, or believed at the time, to be reasonable assumptions, the Company cannot assure shareholders and prospective purchasers of securities of the Company that actual results will be consistent with such FLI, as there may be other

factors that cause results not to be as anticipated, estimated or intended, and neither the Company nor any other person assumes responsibility for the accuracy and completeness of any such FLI. Except as required by law, the Company does not undertake, and assumes no obligation, to update or revise any such FLI contained in this document to reflect new events or circumstances. Unless otherwise noted, this document has been prepared based on information available as of the date of this document. Accordingly, you should not place undue reliance on the FLI, or information contained herein.

Furthermore, should one or more of the risks, uncertainties or other factors materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described in FLI.

Assumptions upon which FLI is based, without limitation, include: the results of exploration activities, the Company's financial position and general economic conditions; the ability of exploration activities to accurately predict mineralization; the accuracy of geological modelling; the ability of the Company to complete further exploration activities; the legitimacy of title and property interests in the Deposits; the accuracy of key assumptions; the ability of the Company to obtain required approvals; geological, mining and exploration technical problems; failure of equipment or processes to operate as anticipated; the evolution of the global economic climate; metal prices; foreign exchange rates; environmental expectations; community and non-governmental actions; and, the Company's ability to secure required funding. Risks and uncertainties about The Company's business are discussed in the disclosure materials filed with the securities regulatory authorities in Canada, which are available at www.sedarplus.ca.
